RE: CL&P Review of the Connecticut Central Air Conditioning Impact and Process Evaluation

Dear Mr. Diamond,

The Connecticut Light and Power Company (CL&P) is pleased to submit these written comments with regard to a second draft evaluation report: *Central Air Conditioning Impact and Process Evaluation* (Study), Draft, September 10, 2014, NMR Group, Inc. and DNV GL (authors). The draft Study was submitted to CL&P on September 12, 2014 with a request for comments to be provided by September 26, 2014. The primary goals of the Study were to determine the program electric and summer peak savings, as well as to identify methods to better induce early replacement of central air conditioning units.

CL&P has reviewed the revised Study and does not have any specific comments on the results. CL&P found the Study to be high quality, thorough and well organized. CL&P looks forward to the release of the final Study and using the results of the Study to enhance the quality of its central air conditioning offering.

Thank you for the opportunity to provide these comments.

Very truly yours,

Joseph Swift
