

Connecticut Energy Efficiency Board

2024 Public Input Sessions

Development of the 2025-2027 C&LM Plan

Session 1	Session 2
Tuesday, March 26, 2024 5:30PM – 6:30PM EST	Wednesday, April 3, 2024 12:00PM – 1:00PM EST
Virtual Only Meeting Link Meeting ID: 845 4236 2211 Passcode: 351325 +1 (305) 224-1968 Registration Link	

The Connecticut Energy Efficiency Board (EEB) and the Department of Energy and Environmental Protection (DEEP) invite you to the 2024 Public Input Sessions for the development of the 2025-2027 Conservation and Load Management (C&LM) Plan. Based on feedback received during the February 2024 Equity Workshop, two virtual sessions are being offered in order to accommodate varying schedules of potential attendees – one during mid-day and another held after typical work hours. As a result, the sessions are expected to be duplicative; however, attendees are welcome to attend either session or both sessions.

During these input sessions the EEB’s Technical Consultants will review the potential Plan priorities that are under consideration and will seek feedback and recommendations from the public. For reference, the potential priorities highlighted during the [March EEB Meeting Plan Priorities Presentation](#) included:

- 1) Expanding DEI Efforts
- 2) Developing Decarbonization Goals
- 3) Building Electrification Readiness
- 4) Expanding Electrification
- 5) Bundling Energy Efficiency with Distributed Energy Resources
- 6) Coordination With Federal Funding and Local Energy Policies

Established through CGS 16-245m, the EEB is comprised of 12 voting members representing business and consumer interests as well as state agencies, and five non-voting representatives of the state’s electric and gas utilities. It advises and assists the utilities in the development and implementation of Connecticut’s energy efficiency and demand response plans.

The EEB and DEEP welcome and encourage input as part of the collaborative process with the electric and gas utility companies, the CT Green Bank, interested stakeholders and the public to develop the 2025-2027 Plan. Public input will inform the EEB and DEEP on updates to the next 3-year Plan that will take effect in 2025. The current 2022-2024 Plan and related information may be found online at: <https://energizect.com/eeb-clm-plans>.

Attendees need not register. **In order to facilitate the meeting and ensure enough time for participants, those wishing to provide comments during this session are strongly encouraged to pre-register by emailing the Executive Secretary at EEB_Secretary@EnergizeCT.com by March 22nd for the March 26th session and by March 29th for the April 3rd session.**

Please include your name, company, and electronic copies of your remarks, and/or a PowerPoint presentation if you plan to use one. A record of public input becomes part of the 2025-2027 Plan itself. Therefore, it is important that commenters provide written input, preferably in advance of the session. Presentations during the Public Input Session should be no longer than seven minutes.

Stakeholders may also submit written comments for consideration by submitting them to the Executive Secretary at EEB_Secretary@EnergizeCT.com by **April 3rd**. Stakeholders do not need to attend the Public Input Sessions, nor do they need to provide their comments during the Public Input Sessions, for comments to be considered.

The EEB looks forward to hearing from you during the Public Input Sessions. If you have any questions, please contact the Executive Secretary, James Williamson.

Sincerely,

A handwritten signature in black ink, appearing to read "Anthony Kosior". The signature is fluid and cursive, with the first name being more prominent.

Anthony Kosior
Chair, Connecticut Energy Efficiency Board

About the Connecticut C&LM Plan

The Connecticut C&LM Plan promotes efficient energy use, helps residents and businesses save on their electric and natural gas bills, advances economic development, reduces electric demand, and helps reduce air pollution. C&LM Plan programs serve residential customers, including limited-and fixed-income customers, as well as business and municipal customers. Connecticut's energy efficiency programs are funded by a charge on customers' utility bills and administered by the state's electric and gas utilities including: Eversource (previously Connecticut Light and Power and Yankee Gas), The United Illuminating Company, Connecticut Natural Gas, and Southern Connecticut Gas. Additional information on Connecticut's energy efficiency programs can be found at [EnergizeCT.com](http://www.energizect.com) or by calling 1-877-WISE-USE. C&LM Plan program activities and results may be viewed at:

About Energize Connecticut

Energize Connecticut helps you save money and use clean energy. It is an initiative of the Connecticut C&LM Plan, the Connecticut Green Bank, the State, Eversource, UI, SCG and CNG, with funding from a charge on customer energy bills.
