RE: Connecticut Energy Efficiency Fund's Electric and Gas Conservation and Load Management Plan for 2019-21, submitted pursuant to Connecticut General Statutes Section 16-245m(d) – **Item #2 Equitable Distribution**

Dear Mr. Li:

DEEP's Approval with Conditions for the 2019-21 Conservation & Load Management Plan dated 12/20/2018 states:

"Pursuant to CGS Sec. 16-245ee, each EDC must annually submit to DEEP and the Energy Efficiency Board the prior calendar year's Equitable Distribution data on a form prescribed and provided by DEEP no later than July 1, and also submit an updated method of census tract identification and economic status that determines whether the census tract is distressed. This data shall be provided on a census tract basis, or if not available by census tract, on a town-by town basis, the amount of conservation program funds assessed and the amount of incentives expended, disaggregated as small or large customers according the 100 kW peak demand threshold, and further disaggregated by customer class (i.e. Residential and C&I). The residential data component for small customers shall be disaggregated by the HES and HES-IE programs, and identify the total number of projects participating in each program, and disaggregate those project numbers by housing stock (i.e., single family, multi-family (2-4 units), and multi-family (>4 units))."

Please find enclosed a copy of UI's 2020 Equitable Distribution report.

If you have any questions please do not hesitate to contact me at (203) 499-2822 or Brian Sullivan at (203) 926-4837.

Very truly yours,

Joel Kopylec
